

## ILAE Actions to Support People with Epilepsy Affected by the Situation in Ukraine

Work with all affected ILAE chapters to assess medical needs, including supplies of anti-seizure and rescue medications

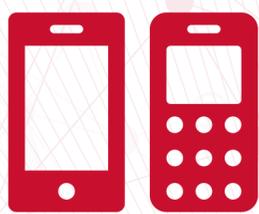

Liaise with pharmaceutical companies and humanitarian partners to facilitate ongoing supplies of life saving medications for people with epilepsy

Develop guidelines for clinicians in affected countries on different medical formularies and, if needed, how to safely change prescriptions for anti-seizure medication

Translate essential epilepsy-related phrases and terms into all commonly used languages to help with clinician-patient communication

Fundraise to provide mobile phones and pre-paid SIM cards for people with epilepsy to allow for connecting with services, medical record keeping, and psychosocial support

Develop clinical networks to assist with referrals and to support front-line clinicians accessing expert advice on epilepsy

Advocate with all governments for free treatment for all people with epilepsy and engage with humanitarian partners to promote including essential anti-seizure medications in all emergency medical supplies
