

ILAE - CEA

Improve your level in epileptology by studying in a setting of young international peers with a group of dedicated and experienced tutors!

**6th Baltic Sea Summer School on Epilepsy (BSSSE 6)
Rostock, Germany, July 8-13th, 2012**

The **Baltic Sea Summer Schools on Epilepsy (BSSSE)** take place annually in one of the countries of the Baltic Sea region. They are clinically oriented and focused on comprehensive aspects of diagnosis and treatment of epilepsy but also provide a platform for transnational research. The open and informal atmosphere of the BSSSE allows easy communication between faculty and up to 40 international students. BSSSE 6 will take place in Rostock, Germany.

Target audience: the BSSSE are primarily addressed to medical postgraduates and junior researchers (age usually up to 40 years) with a special clinical or scientific interest in epilepsy. Applicants from the Baltic Sea region are given priority but participants from all parts of the world are accepted.

Preliminary topics include: differential diagnosis of seizures and syndromes, neuroimaging and EEG in epilepsy (including training sessions), MEG, AED treatment and pharmacology (including timing of AED application), ictogenesis in focal and generalized epilepsies. - BSSSE 6 will especially focus on basic mechanisms of epilepsy and translational research.

Study methods: lectures, tutorials, case-oriented learning, interactive group work with video. Participants are requested to bring own cases and encouraged to present own research for peer discussion.

Registration fee: 800 Euro. A number of bursaries are available.

Important information, dates and addresses for BSSSE 6
