ACTIVITIES AND ACCOMPLISHMENTS

Main activities of the Russian League Against Epilepsy (RLAE):

- Prophylactics, diagnostics and therapy of Epilepsy and Paroxysmal Disorders
- We do scientific research together with neurology departments in the universities and specialized departments in the federal clinical research centers.
- We increased awareness about epilepsy in the population.
- We work on the continuity of care from childhood to adulthood and then to a more mature age based on conception: "epilepsy-through-the-entire-life."
