BIOGRAPHY

I am a neurosurgeon and professor in neuroepidemiology. I have been dedicated in neuroscience clinical and research work for 5 decades, worked successively in grassroots medical facilities, municipal/national research institutes and governmental public health sections in China. My research achievements in prevention and control of cerebrovascular disease and epilepsy in community, have gained more than 10 Beijing municipal and China National science development awards. In the 1980s, I worked at the US National Institutes of Health (NIH) as a visiting fellow and scientist for 2 years.

I have published extensively with more than 70 scientific articles in China as well as internationally. As a chief editor, I have also published a book entitled ‘Epidemiology of Nervous System Diseases’ and a “Green Book of Prevention and Control of Epilepsy in China”.
