

SUDEP Task Force

Objectives:

- Identify priority areas in knowledge and practice related to SUDEP
- Promote multicentre research and trials on SUDEP prediction and its prevention
- Improve understanding, knowledge, and awareness of SUDEP among epileptologists, general neurologists, pediatric neurologists, medical examiners, and general practitioners
- Promote collaboration with key stakeholders and organisations in related fields

Deliverables:

Research and medical practice

- Report on revised SUDEP definition (sudden death in epilepsy), stratified according to identified causes and pathomechanisms
- Consensus statement on SUDEP counseling along with a written support for structured communication on SUDEP (to be used by physicians)

Education

- Scientific symposium at international epilepsy congress to promote research and trials on prevention
- Patient webinars and symposia in association with stakeholders
