Course description

11th EPODES Basic is an interactive course on surgically remediable epilepsies, presurgical evaluation, scalp and intracranial EEG, neuropsychology, imaging and psychiatric issues of surgical patients before and after surgery. EPODES courses are organized in three-year cycles. This year the course will be dedicated to epilepsy surgery focused on mainly basic information including selection of surgical candidates, presurgical evaluation, different focal epilepsies, surgical techniques and outcome. The program consists of presentations by keynote speakers and case presentations by tutors and students.

The course is organized as part of the European Project of Development of Epilepsy Surgery Programs (EPODES) under aegis and with funding from ILAE Commissions of Epilepsy Surgery and ILAE – Europe.

ILAE Residential Comprehensive Epilepsy Surgery Course Series

11th EPODES - Basic
