

15th Baltic Sea Summer School on Epilepsy (virtual) Sept 21/22 and 27-29, 2022

Announcement

The 15th edition of the well-known Baltic Sea Summer School on Epilepsy (BSSSE) will again take place as a virtual event, on 5 afternoons in September 2022.

Target audience: The BSSSE are primarily addressed to medical postgraduates and junior researchers (age usually up to 40 years) with a special clinical or scientific interest in epilepsy.

Topics: All topics relate to the curriculum of the ILAE Epilepsy Academy. They include EEG (Norm variants and artifacts; Recognizing spikes), Imaging (Typical mistakes to avoid; Finding epileptogenic lesions), Pharmacotherapy (How to use ASM monitoring; Where are we with the newest ASM generation?), Status epilepticus, Genetically defined epilepsies, Epileptic aura, Epilepsy and mental handicap, Subjective factors in epilepsy treatment, and Case-oriented study (3 sessions with distinguished tutors).

Format: The BSSSE will accept 36 participants who work in 4 groups of parallel webtorials. Webtorials are a strictly interactive format where a small group works with a faculty member. Active participation is expected and encouraged by the tutors. Fluency in English is a precondition. Webtorials are *not* recorded for later use.

Registration: Participation is free of charge, and participants will be accepted on a first come – first served basis. The deadline for applications is June 30, 2022. The application must include an application form and a CV.

Certificates: Certificates will only be given to participants who are present at the webtorials.

For information and application please contact:

Petra Novotny, BSSSE office: petra.novotny@wolfstiftung.org

Deadline for applications: June 30, 2022

The 15th BSSSE is sponsored by the Prof. Peter & Jytte Wolf – Foundation for Epilepsy
