Acknowledgements

The preclinical epilepsy common data elements (CDEs) included in this site were created based on the CDEs and case report forms (CRFs) of the TASK3 working groups of the International League Against Epilepsy (ILAE) / American Epilepsy Society (AES) Joint Translational Task Force.

The electronic forms were created by the LONI resource investigators at the University of Southern California: Dr Arthur Toga, Karen Crawford, Monica Estrada and Lindsey Lewis. We are grateful for the generous support and financial sponsoring offered by the ILAE, AES, and CURE Epilepsy, as well as for the support by NINDS staff, Drs Vicky Whittemore and Brandy Fureman. The CURE Epilepsy support was based on a grant CURE Epilepsy received from the United States Army Medical Research and Materiel Command, Department of Defense (DoD), through the Psychological Health and Traumatic Brain Injury Research Program under Award No. W81XWH-15-2-0069. Opinions, interpretations, conclusions and recommendations are those of the authors and are not necessarily endorsed by the Department of Defense.

We are grateful for the feedback and assistance on improving the electronic CRFs provided by members of the ILAE/AES Joint Translational Task Force, investigators of the PTE Initiative of CURE Epilepsy, as well as by EpibioS4Rx investigators Drs Patricia Grandizoli Saletti (Albert Einstein College of Medicine, Bronx NY USA), Idrish Ali (Monash University, Melbourne, Australia), Brian Rundle (UCLA, Los Angeles USA) and Cesar Santana Gomez (UCLA, Los Angeles USA).

The original publications of these preclinical epilepsy CDEs and information on the use of these case report forms are included in a special issue on “Preclinical common data elements of the ILAE/AES Joint Translational Task Force” (Epilepsia Open volume 3, Issue S1, 2018: https://onlinelibrary.wiley.com/toc/24709239/2018/3/S1).
