

Postgraduate course in Childhood Epilepsy

Are you a neurologist aiming to become a future leader in childhood epilepsy?

- The Postgraduate Course in Childhood Epilepsy (KU Leuven) is the first academic program in Europe fully dedicated to childhood epilepsy. This selective, **one-year** postgraduate course offers **advanced, hands-on training** at the highest academic and clinical level.
- Designed for **neurologists and pediatric neurologists**, the programme combines **expert-led teaching in Leuven** with a **four-month clinical internship** in a recognized European epilepsy center, offering advanced, hands-on and multidisciplinary training.

 Academic year **2026–2027**

 Application deadline: 30 June 2026

Interested in taking the next step in your professional development?

Postgraduate course in Childhood Epilepsy

Looking to deepen your expertise in Childhood Epilepsy?

KU Leuven offers a unique opportunity through its **Postgraduate Course in Childhood Epilepsy**, the **first European academic programme fully dedicated to this field**.

This **one-year programme is tailored for neurologists and paediatric neurologists** seeking advanced, practice-oriented training that goes beyond standard curricula:

- Two intensive **on-campus training weeks in Leuven**
- A **four-month clerkship** in a leading European epilepsy centre
- Strong emphasis on **scientific development and international collaboration**

Graduates earn an **Academic Certificate from KU Leuven** and become part of a growing European network of childhood epilepsy experts.
