Foreword	<i>Antonio V. Delgado-Escueta</i>	VII
Preface	<i>The Editors</i>	IX
Chapter 1	The history of progressive myoclonus epilepsies <i>Pierre Genton, Pasquale Striano and Berge A. Minassian</i>	1
Chapter 2	Neurophysiology of myoclonus and progressive myoclonus epilepsies <i>Giuliano Avanzini, Hiroshi Shibasaki, Guido Rubboli, Laura Canafoglia, Ferruccio Panzica, Silvana Franceschetti and Mark Hallett</i>	11
Chapter 3	Unverricht-Lundborg disease <i>Arielle Crespel, Edoardo Ferlazzo, Silvana Franceschetti, Pierre Genton, Riadh Gouider, Reetta Kälviäinen, Miikka Korja, Maria K. Lehtinen, Esa Mervaala, Michele Simonato and Annika Vaarmann</i>	35
Chapter 4	Lafora disease <i>Julie Turnbull, Pasquale Striano, Pierre Genton, Stirling Carpenter, Cameron A. Ackerley and Berge A. Minassian</i>	49
Chapter 5	SCARB2/LIMP2 deficiency in action myoclonus-renal failure syndrome <i>Leanne M. Dibbens, Michael Schwake, Paul Saftig and Guido Rubboli</i>	79
Chapter 6	Neuronal ceroid lipofuscinoses <i>Dragos A. Nita, Sara E. Mole and Berge A. Minassian</i>	93
Chapter 7	Sialidoses <i>Silvana Franceschetti and Laura Canafoglia</i>	115
Chapter 8	Myoclonic epilepsy in mitochondrial disorders <i>Costanza Lamperti and Massimo Zeviani</i>	121
Chapter 9	Progressive myoclonic epilepsy associated with neuroserpin inclusion bodies (neuroserpinosis) <i>Benoit D. Roussel, David A. Lomas and Damian C. Crowther</i>	133

Chapter 10	<i>GOSR2</i> : a progressive myoclonus epilepsy gene <i>Leanne M. Dibbens and Guido Rubboli</i>	143
Chapter 11	<i>KCTD7</i> -related progressive myoclonic epilepsy <i>Patrick Van Bogaert</i>	149
Chapter 12	Autosomal recessive progressive myoclonus epilepsy due to impaired ceramide synthesis <i>Edoardo Ferlazzo, Pasquale Striano, Domenico Italiano, Tiziana Calarese, Sara Gasparini, Nicola Vanni, Floriana Fruscione, Pierre Genton and Federico Zara</i>	155
Chapter 13	Spinal muscular atrophy associated with progressive myoclonic epilepsy <i>Haluk Topaloglu and Judith Melki</i>	165
Chapter 14	Myoclonus epilepsy and ataxia due to potassium channel mutation (MEAK) is caused by heterozygous <i>KCNC1</i> mutations <i>Fábio A. Nascimento and Danielle M. Andrade</i>	173
Chapter 15	Autosomal dominant cortical tremor, myoclonus and epilepsy <i>Pasquale Striano and Federico Zara</i>	179
Chapter 16	Myoclonus and seizures in PMEs: pharmacology and therapeutic trials <i>Roberto Michelucci, Elena Pasini, Patrizia Riguzzi, Eva Andermann, Reetta Kälviäinen and Pierre Genton</i>	187
Chapter 17	Post-modern therapeutic approaches for progressive myoclonus epilepsy <i>Berge A. Minassian</i>	199
