Contents

<i>List of contributors</i>	<i>page xi</i>
General introduction <i>Philip A. Schwartzkroin</i>	1
Section 1: Chronic models in intact animals – concepts and questions	19
Introduction	20
1 The kindling model of epilepsy <i>James O. McNamara, Douglas W. Bonhaus, and Cheolsu Shin</i>	27
2 Focal trigger zones and pathways of propagation in seizure generation <i>Karen Gale</i>	48
3 Genetic models of the epilepsies <i>Phillip C. Jobe, Pravin K. Mishra, Nandor Ludvig, and John W. Dailey</i>	94
4 Noradrenergic modulation of excitability: transplantation approaches to epilepsy research <i>Olle Lindvall</i>	141
5 Sensitivity of the immature central nervous system to epileptogenic stimuli <i>Solomon L. Moshé, Patric K. Stanton, and Ellen F. Sperber</i>	171
Section 2: Features of the epileptogenic brain	199
Introduction	200
6 Neurophysiological studies of alterations in seizure susceptibility during brain development <i>John W. Swann, Karen L. Smith, Robert J. Brady, and Martha G. Pierson</i>	209
7 Electrophysiology and pharmacology of human neocortex and hippocampus in vitro <i>Massimo Avoli</i>	244
8 Cell death, plasticity, and epilepsy: insights provided by experimental models of hippocampal sclerosis <i>JoAnn E. Franck</i>	281

x	<i>Contents</i>
9 Sprouting as an underlying cause of hyperexcitability in experimental models and in the human epileptic temporal lobe <i>Thomas P. Sutula</i>	304
10 Rapidly recurring seizures and status epilepticus: ictal density as a factor in epileptogenesis <i>Eric W. Lothman, Janet L. Stringer, and Edward H. Bertram</i>	323
Section 3: 'Normal' brain mechanisms that support epileptiform activities	357
Introduction	358
11 Brain slice models for the study of seizures and interictal spikes <i>Wilkie A. Wilson and Andrew Bragdon</i>	371
12 Generation of epileptiform discharge by local circuits of neocortex <i>Barry W. Connors and Yael Amitai</i>	388
13 Study of GABAergic inhibition and GABA _A receptors in experimental epilepsy <i>Robert K. S. Wong and Richard Miles</i>	424
14 High potassium-induced synchronous bursts and electrographic seizures <i>Christopher J. McBain, Stephen F. Traynelis, and Raymond Dingledine</i>	437
15 Anti-epileptic effects of organic calcium channel blockers in animal experiments <i>Erwin-Josef Speckmann and Jörg Walden</i>	462
Recent advances	487
Index	529
