

New Vision on Diagnosis, Treatment and Care of Epilepsy

**11th Combined Migrating Caucasian
Course on Epileptology
11th CMCCE
3-6 July, 2025
Tbilisi, Georgia**

Announcement

11th Combined Migrating Caucasian Course on Epileptology (11th CMCCE) "**New Vision on Diagnosis, Treatment and Care of Epilepsy**" is addressed to applicants providing care for patients with epilepsy and who wish to refine their skills in epileptology. Pediatric and Adults' specialists in neurology, psychiatry, pediatrics, clinical neurophysiologists and neuropsychologists are welcome to apply.

The CMCCE addresses doctors primarily from the Caucasian region, but applicants from other countries may also be accepted in case there are still places available.

Description

The course is focused on comprehensive aspects of diagnosis and treatment of epilepsy according to new guidelines and recommendations of ILAE. It will also include the comprehensive care of patients with epilepsy. Different issues of adult and pediatric epileptology will be covered.

The didactic format will promote the combination of lectures and interactive case discussions. Case orientated learning is emphasized. Didactic cases provided by tutors and case reports prepared by participants are planned to be discussed in small groups of participants.

Learning objectives

The course, on completion, will enable the participants to receive the up-to-date information and expert opinion on the main topics of clinical epileptology, to improve their competence and gain practical skills in the diagnostic work-up and decision-making concerning the management of different aspects of pediatric and adult epileptology. The tutorials held by experienced epileptologists through interactive education are expected to provoke vivid discussions and to stimulate critical diagnostic approach, especially regarding the diagnoses, comorbidities, neuroimaging and pharmacotherapy. Didactic cases provided by tutors in case-oriented learning will be useful to students in dealing with clinical problems in

daily practice. By presenting their own case or scientific reports during the group sessions, the participants are encouraged to improve the competence and confidence in lecturing and teaching.

The teaching methodology is elaborated in cooperation with ILAE and ILAE-Europe

The 11th CMCCE will be given in **English**.
