ILAE ASEPA EEG Master Class

– Epilepsy in Malformation of Cortical Development

Date : 2025.06.21 (Saturday)

Place : B1, Glory-Butterfly Room, Sheraton Grand Taipei Hotel

Registration deadline : 31 May, 2025

INTRODUCTION

Malformations of cortical development (MCD) are a group of disorders characterized by abnormal formation and organization of the cerebral cortex. These malformations can lead to a variety of neurological problems, including epilepsy, which is often resistant to conventional treatments. This class aims to provide an overview of the role of electroencephalography (EEG) in diagnosing and managing epilepsy associated with MCD. EEG is a crucial tool in diagnosing epilepsy, particularly in cases associated with MCD.
